

# Mobile Hotspot Overview

This resource will guide you through setting up your Hotspot and connecting for the first time.

## Device Diagram

Familiarize yourself with your AT&T Unite Express 2:

## Locate Network Name & Password

- The device will display **Signal bars** and the **4G LTE** icon on the first home screen when successfully connected to the AT&T Network.
- The **Network Name** and **Password** are also displayed on the main screen.

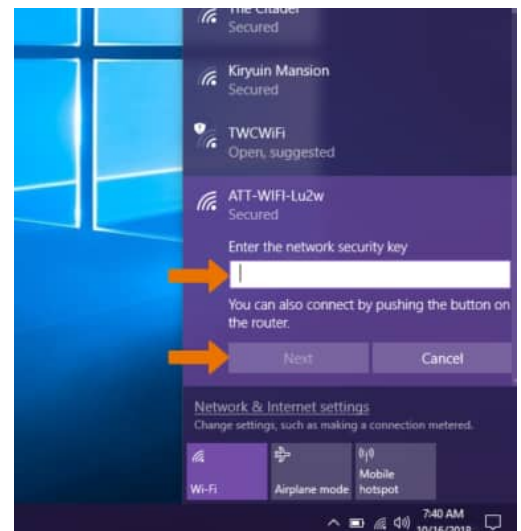

**Note:** Press the **Power button repeatedly** to cycle through home screens.

## Connect Windows Computer to Hotspot

1. From your PC, click the Connectivity icon on bottom right of the screen.
2. Click the AT&T Hotspot's Wi-Fi network, then click Connect.
3. Enter the Password, then click Next. Your computer is now connected to the Wi-Fi network.

**Note:** Your hotspot will show a **different Network Name** and **Password**.

## Connect Mac Computer to Hotspot

1. From your Mac, click the Wi-Fi icon.
2. Click the name of the AT&T Hotspot's Wi-Fi network.
3. Enter the Password, then click Join. Your computer is now connected to the Wi-Fi network.
